PROFESSIONAL SUMMARY

Associate Project Manager with hands-on experience supporting end-to-end project delivery across enterprise procurement, asset management, and integration initiatives. Strong exposure to UAT governance, requirement analysis, RAID management, stakeholder coordination, and delivery tracking. Known for stabilizing complex engagements, improving delivery predictability, and acting as a reliable bridge between business and technical teams. Solid understanding of SDLC process with growing exposure to data validation and reporting concepts.

PROFESSIONAL EXPERIENCE

RCS Tech LLP – Bangalore

Associate Project Manager | Oct 2024 – Present

(Promoted from Sales Executive based on delivery ownership and cross-functional leadership)

Key Responsibilities & Achievements

- Support end-to-end project delivery across enterprise procurement and asset management implementations, including requirement discussions, UAT planning/execution, and client communication.
- Independently coordinate daily stand-ups, client calls, and internal war rooms; document decisions, track action items, and ensure timely closure.
- Maintain RAID logs and proactively identify, track, and escalate risks, issues, and dependencies to leadership.
- Drive UAT governance through structured defect triage, prioritization, and coordination with engineering, QA, and business stakeholders.
- Took proactive ownership of delivery activities (requirement gathering, UAT coordination, stakeholder communication) prior to formal PM role, leading to promotion.

Key Client Engagements

RBL – Procurement Management Software

- Led requirement discussions, UAT planning, and daily client stand-ups for a large-scale procurement implementation.
- Introduced structured war-room and defect triage processes, reducing weekly reported UAT defect inflow from over 25 to fewer than 5.
- Performed basic SQL-based backend data validation to support UAT and verify procurement and master data accuracy.
- Improved delivery predictability and restored client confidence in execution.

Wells Fargo – Asset Management Software

- Restarted and stabilized a stalled UAT cycle through structured communication flows and issue-resolution mechanisms.
- Supported internal UAT environment setup to enable smoother testing and development cycles.
- Coordinated closely with engineering and QA teams to track defects and delivery risks.
- Currently supporting discussions for ServiceNow integration, understanding touchpoints and sample payloads.

LinkedIn – Fixed Asset Management (SSO Integration)

- Coordinated end-to-end Single Sign On integration aligned with authentication and security requirements.
- Supported delivery on compressed timelines by resolving integration dependencies across teams.
- Assisted with UAT coordination and validation of authentication flows.

Kotak – Procurement & Asset Management Software

- Managed enhancement request for existing application from planning to production deployment, ensuring clarity on scope, dependencies, and timelines.
- Coordinated resolution of on-premise infrastructure blockers with the clients IT team to enable uninterrupted UAT.
- Tracked UAT progress, defect patterns, and delivery metrics using Excel-based trackers.

Expertia AI – Bangalore

Sales Associate | Dec 2023 – Oct 2024

- Supported customer onboarding to ensure smooth product deployment and user adoption of the HR tech application.

- Assisted with a large-scale data migration (~60,000 line items) for a client within compressed timelines.
 - Coordinated between product and client teams to clarify requirements and resolve functional issues.
 - Built strong client relationships through structured communication and timely issue resolution.
-

Happymonk AI – Bangalore

Business Development Intern | Sep 2023 – Dec 2023

- Conducted market research to support product expansion initiatives.
 - Assisted with product demos and early-stage prospect engagement.
-

EDUCATION

B.E. – Information Science & Engineering

RNS Institute of Technology, Bangalore | 2019 – 2023

SKILLS

Project Management

- Project Coordination
- UAT Planning & Governance
- RAID Management
- Stakeholder Communication
- Escalation & Risk Handling
- Agile / Scrum Fundamentals
- SDLC Lifecycle Understanding

Technical (Basic / Learning)

- **SQL** – basic queries for backend data validation
- **Power BI** – currently learning fundamentals (dashboards, KPIs)
- **Excel** – formulas, trackers, reporting

Other

- Process structuring
 - Cross-functional collaboration
 - Client-facing & executive-ready communication
-

CERTIFICATIONS

- Career Essentials in Project Management – Microsoft & LinkedIn
 - Getting Started with Professional Scrum – LinkedIn Learning
 - CAPM® Certification Training – Simplilearn
 - CAPM® Exam – In Progress (Exam planned for March)
 - JLPT N5 – Classes in Progress (Exam planned for coming July)
-

DOMAIN EXPOSURE

- Procurement & Purchase Order workflows
- Fixed Asset Management lifecycle
- Invoicing and payment process
- UAT and release coordination
- Enterprise application delivery support
